FROM: Al Novak

DATE: 4/30/85

SUBJECT:
Tank removal - Bendifx

FILE NO:

SUMMARY OF COMMUNICATION:

Bendifx removed one 500 gal waste oil tank on 4/29/85. Crowley Environmental handled the tank removal and disposal at Casmalia. Approximately 26 cubic yard of soil was also removed to Casmalia. This soil was contaminated with oil from the tank which had over a dozen holes in it ranging from $\frac{1}{16}$ " ϕ to 3" ϕ . Two soil samples were taken of the contaminated soil to identify the materials present. The excavation was taken down to 15 feet and the bottom of ~~area~~ still showed signs of contamination. I told Ron Slatterbeck of Bendifx that we will need a workplan to determine the vertical and lateral extent of the contamination. This Plant is located upgradient of the contaminated water wells in North Hollywood.

CONCLUSIONS, ACTION TAKEN OR REQUIRED:

Bendifx has arranged w/ Leighton & Associates to determine the extent of contamination. They plan to drill a boring on 5/8 and sample.
